 Task: Routine Health Inspection

## General Comments:

---

### Comments:

55. Physical facilities installed/clean/maint.: **Please repair fan in walk in freezer that is causing ice build up on food**
48. Warewashing facilities installed, maintained/used test strips present: **Please do not keep out of date sanitizer test strips**
49. Nonfood contact surfaces clean: **Please clean the inside floors to every walk in cooler. Please clean out the bottom of every reach in cooler. Please clean floors and walls behind cook top.**
16. Food contact surfaces cleaned, sanitized: **Please clean all drink nozzles. Please do not allow tubes that connect to soda syrups to touch the ground.**
36. Thermometers provided, accurate: **Please make sure every refrigerator and freezer has a backup thermometer inside**
23. Proper date marking, disposition: **Please make sure all food receives both a label and date. Please establish and keep a log of when all Hot Dogs were prepared and hot held**
15. Food separated, protected from contamination: **Please make sure all raw food is in a tightly sealed container and stored below ready to eat food. Please make sure all food containers are shut.**
6. Proper eating/drinking/tobacco/vape use: **Please make sure all employee drinks are in a closed container away from food prep areas. Please make sure all employee food/ drinks are in a clearly marked spot and separated from customer food**
10. Adequate handwashing facilities--properly supplied/accessible/used: **Please do not block any hand wash stations. Please do not use hand wash stations for any other purpose than washing hands**
39. Contamination prevented during food preparation/storage/display: **Please do not leave food packages on the floor. Please make sure all food is covered and properly arranged. Please dispose of all lettuce heads That have been contaminated**
- 

### IMMINENT HEALTH HAZARDS

Certain conditions are grounds for immediate facility closure--these conditions are called Imminent Health Hazards. Imminent Health Hazards include lack of hot/cold water, loss of significant portion of refrigeration on site such as loss of walk in cooler/walk in freezer, sewage backup, unsanitary conditions, lack of electricity, fire/flood, multiple complaints or apparent outbreak of foodborne illness, improper use of toxic materials on site, or any other incident or condition on site that may compromise food safety

***Facilities are required by law to contact COP Code Enforcement, cease all food preparation/service, and close voluntarily in case of Imminent Health Hazard.***

If an Imminent Health Hazard occurs, contact NRH Consumer Health immediately at any time by calling 817-281-1000 and asking for the health inspector on call.

### FOOD MANAGER AND FOOD HANDLER CERTIFICATION REQUIREMENTS

At least one person with supervisory capacity per food establishment permit will be required to become a Certified Food Manager (CFM). The original certificate verifying CFM training must be posted in public view. A CFM must be issued by a TXDSHS or ANSI-accredited agency: <https://dshs.texas.gov/food-managers/>

All other persons employed by the food establishment must obtain Food Handler certification from a TXDSHS or ANSI-accredited agency within 30 days of hire. <https://dshs.texas.gov/food-handlers/> Copies of this certification must be on site and available during inspection

### CHANGES TO MENU/EQUIPMENT/PLUMBING/FACILITY LAYOUT MUST BE APPROVED BEFOREHAND

Any changes to a food establishment menu, equipment, plumbing, or facility layout must be approved by NRH Consumer Health before changes are made.

### CONSUMER ADVISORY AND ALLERGEN LABELING

If an animal food such as beef, pork, lamb, poultry, milk, eggs, fish, or shellfish is served raw or undercooked, a written consumer advisory must be provided to consumers. An example of a written consumer advisory includes a note on the menu stating that, "Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions."

Packaged food that contains one of the eight major food allergens (milk, eggs, soy, wheat, peanuts, tree nuts, fish, or shellfish) must be labeled with a written allergen warning. An example of an allergen warning includes a label on the food product that states, "Food or beverages may contain milk, eggs, soy, wheat, peanuts, tree nuts, fish, or shellfish."

### WRITTEN EMPLOYEE HEALTH POLICY AND VOMIT/DIARRHEA CLEAN UP PROCEDURES REQUIRED

A written employee health policy and written procedures about how the food establishment will clean up after a vomit /diarrheal event are required on site. These policies must be available for inspection. Examples of these policies are available at [www.dshs.texas.gov](http://www.dshs.texas.gov)

### CERTAIN RECORDS MUST BE AVAILABLE DURING HEALTH INSPECTION:

Certain records must be available for review during a food establishment inspection. These include:

- Certified Food Manager/Food Handler training certificates,
- Grease trap service records (service is due every 90 days),
- Pest control service records,
- Daily temperature logs for all hot/cold hold equipment and as required by inspector,
- Logs related to a variance, specialized process, or HACCP plan.
